

Boat – New Product Comparison

New discounts and options lift the new boat product above the competition.

Substantial changes to the boat program will help you customize coverage for just about anything up to 26 feet in length that floats. Yachts (27 feet or greater) are now covered in a separate program with different coverage limits and options. The number of discounts has tripled, and there are new options to customize the coverage (which replace the previous endorsement packages).

Streamlined process gets your quote done fast

- Key questions that may prevent a risk from being accepted are asked up-front to save you the time of creating a full quote.
- Customer and vehicle data is “pre-filled” using information already entered into the system and from other sources. This eliminates duplication and streamlines the process.
- Integrated C.L.U.E. reports for watercraft losses determine the number of claims, and import the details.
- Integrated MVR reports automatically import any violation details saving you time.
